

## Team Budget Planner

This document contains contents for:

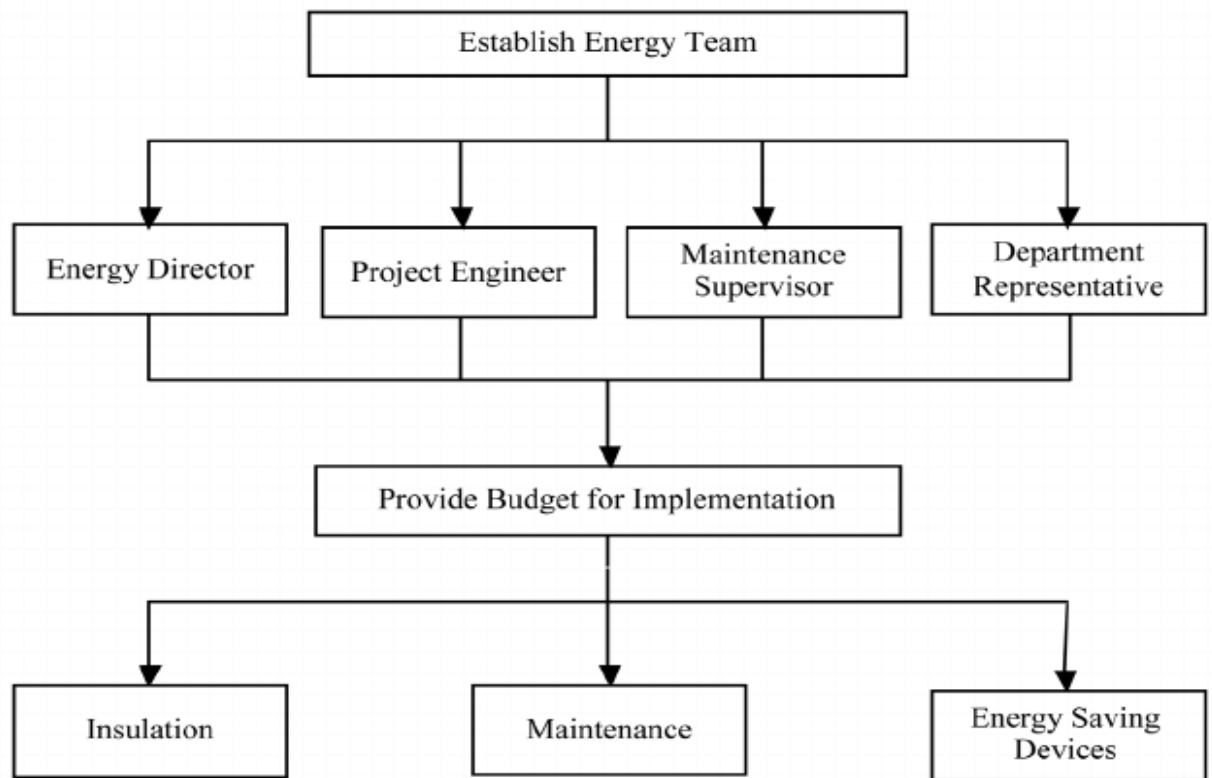

- Project Description
- Flow of the Application
- Core concepts used in project
- Conclusions

### **1.Project Description:**

As a developer, write a program using JavaScript to decide the budget of a specific team.

- You need to develop a website where program managers of a specific team will add details of professional deals they want to have with vendors.
- The finance team will check expenses of those teams and will decide their annual budget.
- Versions of the code should be tracked on GitHub repositories
- Team Budget Planner should work properly.

### **● 2.Application Flow:**

### **3.Core concepts used in project:**

- Visual Studio Code: An IDE to code for the application
- JavaScript: A programming language
- Git: To connect and push files from the local system to GitHub
- GitHub: To store the application code and track its versions
- JavaScript concepts: Functions, prototypes, primitives, objects, IIFEs, promises, async, and webpack

### **4.Conclusions:**

This project is designed to creating a team budget planner using java script.
